

## ***The Bossman "Pioneer" Fire Range Info Sheet***

Bossman has rebuilt the trusted Pioneer Fire that New Zealanders know and love. Pioneer Fires are not clean air approved, meaning that they can only be installed outside of clean air zones, and on properties larger than 2 hectares. However they are perfect for rural/lifestyle living, farmers and back country huts that are after a classic New Zealand fire.

### **Bossman "Pioneer Cottage"**

Our smallest fire, perfect for small farm cottages and homes. The cottage has the option of converting to a DOC Fire - a solid door (no glass) and no brass railings, perfect for backcountry huts. Approx 14 kW output.

Overall Size: Width – 448mm, Depth – 706mm, Height – 650mm (including feet, ashtray ect)

Internal Woodbox Size: Width – 350mm, Depth – 510mm, Height – 340mm

### **Bossman "Pioneer Classic"**

A kiwi classic, our flagship fire perfect for almost any location. Approx 22 kW output.

Overall Size: Width – 550mm, Depth – 706mm, Height – 735mm (including feet, ashtray ect)

Internal Woodbox Size: Width – 475mm, Depth – 510mm, Height – 425mm

### **Bossman "Pioneer Homestead"**

Our largest fire, best suited for larger homes, and found in many high country homesteads. Approx 32 kW output.

Overall Size: Width – 700mm, Depth – 706mm, Height – 735mm (including feet, ashtray ect)

Internal Woodbox Size: Width – 625mm, Depth – 510mm, Height – 425mm

### **Extra's & Parts**

We supply and install wet backs, standard Roof 7kw or Side 4kw options, as well as one off designs.

Optional heat shields on either the back or sides (or both) allow closer installation to the wall, talk to us for more details.

We also stock numerous spare parts, both for our new models, as well as for older Pioneer Fires, including mutifuels. Parts include baffle plates, grates, glass, brass badges, knobs and rails and bricks.
